

## PUBLICACION ETHICS AND MALPRACTICE STATEMENT

The publication of an article in a peer-reviewed journal is an essential building block in the development of a coherent and respected network of knowledge. It is a direct reflection of the quality of work of the author and the institutions that support them. Peer-reviewed articles support and embody the scientific method. It is therefore important to agree upon standards of expected ethical behavior.

Ethics topics to consider when publishing:

- **Authorship of the paper:** Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study.
- **Originality and plagiarism:** The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others, that this has been appropriately cited or quoted.
- **Data access and retention:** Authors may be asked to provide the raw data in connection with a paper for editorial review, and should be prepared to provide public access to such data.
- **Multiple, redundant or concurrent publication:** An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. *Hormigón y Acero* does not view the following uses of a work as prior publication: publication in the form of an abstract; publication as an academic thesis; publication as an electronic preprint. Information on prior publication is included within each *Hormigón y Acero* Guide for Authors.
- **Acknowledgement of sources:** Proper acknowledgment.
- **Disclosure and conflicts of interest:** All submissions must include disclosure of all relationships that could be viewed as presenting a potential conflict of interest.
- **Fundamental errors in published works:** When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper.
- **Reporting standards:** Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance.
- **Hazards and human or animal subjects:** Statements of compliance are required if the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, or if it involves the use of animal or human subjects.
- **Use of patient images or case details:** Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper.

*Hormigón y Acero* follows the Code of Conduct stated in [COPE Guidelines](#) and [COPE International Standards](#)

In particular, *Hormigón y Acero* subscribes the following Editorial Principles:

- Editor accountability and responsibility for journal content
- Editorial independence and integrity:
- Editorial confidentiality
- Encourage maximum transparency and complete and honest reporting
- Responding to criticisms and concerns, ensure integrity of the published record and encourage scholarly debate
- Ensure a fair and appropriate peer review process Decision whether to review Editors may reject a paper without peer review is made in a fair and unbiased way, the criteria being made explicit.
- Ensure a fair and appropriate Editorial decision-making. All editorial processes are made clear in the information for authors. Editors are not involved in decisions about papers in which they have a conflict of interest.

A more detailed description of how this principles involve the different actors are find in [Elsevier Publishing ethics webpage](#).

In case of ethics malpractice, decision trees provide in Elsevier's [Publishing Ethics Resource Kit](#) are followed.
