Figure 1: Injury pattern among White population related to ligament injuries and IGF2 polymorphism

ELN

$p=0.001$

% nº of injuries

Type of ligament injury

MILD

MODERATE

SEVERE

GG

AG/AA
Figure 2: Injury pattern among Hispanic population related to muscle injuries and ELN and IGF2 polymorphisms.

- **ELN**:
  - p=0.032
  - Graph showing % of injuries by type of muscle injury (MILD, MODERATE, SEVERE) for AA and AG/GG genotypes.

- **IGF2**:
  - p=0.016
  - Graph showing % of injuries by type of muscle injury (MILD, MODERATE, SEVERE) for GG and GC/CC genotypes.
