1. Hepatology and Liver Transplant fellowship at the Hospital Universitario Austral, Argentina

ALEH and the School of Biomedical Sciences of the Austral University from Buenos Aires have come to an agreement of offering a position for a Hepatology and Liver Transplant fellowship. This program consists in 2-years training in the management of patients with liver diseases. The Hepatology and Liver Transplant Unit from the Austral University is one of the largest programs in Argentina with an intense activity in patient care and academic publications. For more information please visit: <http://www.austral.edu.ar/cienciasbiomedicas/medicina/residencias-medicas/residencias-medicas-en-el-hospital-universitario-austral/residencias-posbasicas/hepatologia-posbasica/>.

2. II Clinical Hepatology Course – the best of ALEH/AASLD/APASL/EASL

Next May 2nd and 3rd, the Latin American Association for the Study of the Liver (ALEH) will held its **II Clinical**

Hepatology Course in Lima, Peru. This meeting will highlight the most relevant advances in the field of hepatology presented during the last meetings of the four most relevant Association for the study of the Liver: ALEH, AASLD, APASL and EASL.

ALEH is looking forward to May, to be able to deliver a course of excellent scientific quality. We invite Annals of Hepatology readers to visit the official website for more information: www.lima2019.alehlatam.org.

3. ALEH membership benefits

We invite all readers of Annals of Hepatology, to visit our website www.alehlatam.org to learn more about all the benefits of being a member. The Board of Directors, in conjunction with ALEH's group of interest commissions, are in continuous work to elaborate new proposals to position hepatology in the region thus offering better training tools to its members.
