^c Servicio de Traumatología, Hospital General de Villarrobledo, Villarrobledo, Albacete, Spain

The following erratum has been detected in “Skin infection after infiltration by *Nocardia cerradoensis*” (Enferm Infecc Microbiol Clin. 2016;34(5):327–328):

Where the article states:

According to reference laboratory data, the rate of resistance to linezolid of *Nocardia* sp. in Spain is slowly increasing: currently the rate of resistance is between 3% and 8% depending on the species (Valdezate et al., manuscript in preparation which includes 1217 strains corresponding to 42 species, between 2000 and 2014).

It should state:

According to reference laboratory data, the rate of resistance to linezolid of *Nocardia* sp. in Spain is lower than 1% (Valdezate et al., study submitted for publication which includes 1119 strains corresponding to 42 species isolated between 2005 and 2014).
